- Industrial Projects Introduction

Supervisors

- You'll be assigned to an academic supervisor (for all types of projects)
- You supervisor will provide academic guidance and support through the project.
- Regular **bi-weekly meetings of about 20-30 minutes** are recommended to ensure consistent progress and address any arising challenges.
- AWS computing resource: Open to application after discussing with your supervisor

- Contacts:
  - Contact Yang for: project timeline, allocation, resources, deadline, submissions
  - Contact your supervisor for: academic guidance, meetings and feedbacks, research support, ethnic approval

Projects

- Industrial Projects
  - Collaborate with industry partners, such as fintech startups, to address real-world problems. These projects a on **improving business processes**, **analyzing business data**, and providing **practical solutions** that add value to the organization.
- Academic Projects
  - Work on academic research problems proposed by faculty members. These projects allow you to apply the knowledge and skills acquired in your courses while contributing to innovative research at the forefront of the field.
- Bring Your Own projects
  - Pursue a project based on **your own interests**. This option gives you the freedom to explore and develop ideas that **align with your passions**, provided they meet the academic and feasibility requirements. Or something developed from your previous projects.

Draft Timeline of Projects

	Release	Application/ Submission	Results	Notes
Industrial Projects	Soon	Release +2w	Submission +1w	Fill in Application form
Academic Projects/ BYOP	Mid March		Late April	Fill in Application form
	Mid March		Late April	Discuss with an academic staff before application
Spring vacation : 23 March to 10 April 2026				
Ethnic Application and review		By late May		Training in Enrichment session
TB2 Coursework Submission May 7				
Project Plan Submission		Mid June		
Thesis Submission		TBD (Sep)		Both code and thesis required. Q&A organized by supervisor

Assessment 1

- Project Plan (formative)
  - Abstract: A concise summary of the background, your objectives, and the ideal outcome envisioned.
  - Ethics Statement
  - Project Plan: Two pages detailing your project's motivation, chosen methodology, data sources, related literature, possible milestones, and approximate deadlines for each
  - Time plan formatted as a week-by-week list or a Gantt Chart
  - risk assessment
  - Bibliography/References:

Assessment 2

- Thesis, 80% of unit

  - **Introduction (approx. 2 pages)**: General introduction of this project.
  - **Background (approx. 5 pages)**: Background of the project including related literature.
  - **Execution (approx. 10 pages)**: Details of what you did to complete the project.
  - **Analysis (approx. 10 pages)**: Your results, findings, and evaluation.
  - **Conclusions (approx. 3 pages)**: Summarize your main contributions, the extent to which you achieved your project aims, limitations, and future plans.

  - *These page numbers are examples, not requirements.

Assessment 3

- Live presentation and Q&A, 20% of unit

  - **10 mins live online presentation**

    - Highlight and promote your work in a clear, accessible manner in 10 mins. Areas to cover : Background, Motivation, Methodology, Key Results, Limitations and Future works.

  - **20 mins Q&A session**

    - Reflect on your project progress relative to your initial project plan.
    - Discuss the literature to verify your understanding and engagement with cited papers.
    - Explain your methodology in detail to confirm your comprehension of the concepts.
    - Elaborate on your results, conclusions, and future work to further interpret and discuss your findings.
    - Demonstrate and discuss your code to verify your personal contribution to the project.
